Submersible Sewage Pumps (HES Series):

- For handling liquids containing max. solid sizes of 50 mm, 80 mm and 100 mm sphere Impeller type - vortex channel type with two vane or single vane. semi-open single vane.

- Motor - "F" class insulated dry submersible motor suitable for 415 vac, 50 hz, three phase power supply with IP 68 protection
- Motor is having thermal overload protection
- Motor speed of 960, 1450 or 2800 rpm as per requirement suitable for pumping heads and discharge.
-
- Motor is available with or without cooling jacket.
- Submersible cable of suitable size is provided of 20 mtrs length.
- Dual mechanical seal with pump side seal of silicon carbide vs. silicon carbide.
- Horizontal discharge with suitable size flange or automatic guide rail coupling.
- Pumps can be supplied with skirt base or with automatic guide rail coupling system for pulling out the pump from the pit without removing any nut or bolts.
- Material of construction - all cast iron for non - jacketed type.
- For jacketed type - all cast iron with outer cooling jacket of stainless steel or mild steel.
- heads - up to 40 mtrs
- Capacities - up to 600 cubic meters/hr
- Motor ratings - up to 35 kw
