SSG has been an industry leader for over 17 years, providing custom electronics, electronic devices and programmable logic controllers for OEMs. We strive to understand your needs and market to ensure you get a custom electronic solution that meets your needs and fits your niche markets. We work with you to determine features, expandability, packaging and more.

Trust SSG for your custom electronics needs.

Advantages of Custom Electronics, Devices & PLCs

Designed per your specifications

Cost-effective

Packaged to fit your application

Promotes customer loyalty

Becomes your product with your name

Proprietary design ensures your process is secure

Designed with Years of Experience

Gives you an advantage over your competition

Our engineering staff works with you from concept through product delivery to provide you with the best product to fit your requirements. We use our vast experience in electronics and controls, the latest technology and tried and proven technology to mold a custom product that can satisfy your needs today while giving you room to grow for tomorrow.

SSG understands the complexity and competitiveness of today's markets. You can rest easy, your design is safe with us. We treat each custom design with the highest level of privacy--your design is yours and is not released to anyone other than you without written consent from you. As proof of our commitment to you, we have many Non-Disclosure Agreements in place with our customers.

We have electronics engineering experience with today's latest technologies; including wireless, mesh networks and global positioning (GPS).

Custom Electronics & Devices

From simple circuits to complex electronic designs, we have the expertise in custom electronics. Our design team can work with you to develop your specifications and then design the product using the appropriate technology. We strive to give you a product with longevity, concentrating on minimizing the effect of component obsolescence.

From open-board type custom electronics to environmentally sealed systems, we have the expertise and experience to design the product to your requirements. We provide you with a design from concept through prototype delivery.

We deliver quality designs and prototypes as full production capabilities for producing custom electronics and electronic devices.

Custom Electronics, Electronic Devices and PLCs Replacement Solutions
